Power : 1-AA alkaline dry battery

NOTES BEFORE USE

Please read this manual to familiarize yourself with the various parts of this unit and its proper use. To ensure efficiency and long life for this appliance, use only alkaline batteries.

INSTALLATION OF BATTERY

Remove the battery lid(E)with the supplied opener(F).

Put in the battery in the right direction according to the given symbols of anode and cathode. Shut the battery lid(E).

When replacing the battery, ensure the surface and the battery case is dry.

FILLING WITH WATER

I) Open the water-in lid (A) at the bottom, and stretch out the case (D) until the button (C) comes out fully.

II) After filling, shut the water-in lid (A).

Note: Be sure water temperature is not excessively high as it can be dangerous. When not in use empty all water from the water reservoir(B).

HOW TO USE THE EXTERNAL-USE SPRAYER (H1)

I) Draw out the external-use sprayer (H1) gently.

II) Put the loop handles around your wrist as pictured, then press the button (C).

III) Direct the nozzle to the desired position, press button (C). The intensity of the washing spray can be adjusted by sliding board of the sprayer (H1).

Note: When not in use remove all excess water from the water reservoir (B) to avoid leakage. If you do not remove the water, the water can come out of air intake. The external-use sprayer is designed for external use only.

HOW TO USE THE INTERNAL-USE SPRAYER (H2)

I) Add fresh water to the water reservoir (B). A handy scale is located on the outside of the reservoir (B) if mixing with douche cleaning solutions.

II) Connect the internal-use sprayer (H2) with any end of the tube, the other end connecting with the case (D).

III) Hold the portable bidet with the loop handle around your wrist, inserting the sprayer (H2) into the genital area. Press the button (C) to wash.

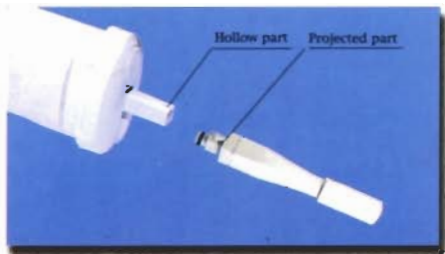

Note: Sterilize the internal-use sprayer (H2) in boiling water before use. To avoid possible infection, never share this unit with others.

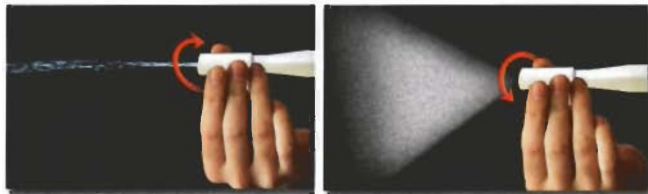

HOW TO USE THE NURSING SPRAYER(H3)

I) Install the nursing sprayer(H3)as pictured below.

II) Open the water-in lid (A) and add cleaning liquid. Turn the top of this sprayer (H3) to select different spraying modes.

III) Put the loop handle around the wrist while holding the appliance, point where you wash and press the button(C).

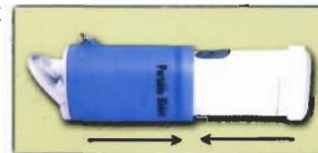

HOW TO TAKE CARE AFTER USE

I) After use, open the water-in lid (A)to ensure no liquid is left in water reservoir(B).

II) Take out the sprayer from case(D), and wash it in fresh water. Wipe up the moisture,then fill the external-use sprayer (H1)into the case(D) in the right direction.

III) Open the water-in lid (A), press the case (D) and water reservoir (B) at the same time, until case (D) comes into the water reservoir (B) fully. Shut the water-in lid (A).

IV) Put the cleaner,internal-use sprayer (H2), and nursing sprayer(H3)into the plastic bag, then in the handbag (G).

Note: Do not pour water on the external case (D). Do not use boiling water with this unit at any time. Remove the battery from case (D) when not used for extended periods.
